I am a Software developer proficient in building out pixel perfect UI using various front end technologies such as ReactJS, TailwindCSS, Firebase and other technologies. Also highly competent working with languages like Typescript and Javascript.

PROJECTS

PROTASKMATE, — *Software Developer*

MARCH 2023 - PRESENT

- Drag and drop functionality for tasks: Enabled users to easily rearrange and prioritize tasks by dragging them to different columns.
- Task categorization: Implemented columns to categorize tasks into different stages or categories, providing a clear visual representation of workflow.
- User-friendly interface: Designed an intuitive and user-friendly interface that makes it easy for users to interact with the task board and manage their tasks.
- Responsive design: Ensured that the app is responsive and works seamlessly on different devices and screen sizes.
- Data persistence: Implemented a backend and database integration with Firebase to store and retrieve task data, ensuring tasks are saved even after closing the app.
- Task details: Added the ability to view and edit task details, such as title, description, due date, and assigned user, providing comprehensive task management.

RESUMATE, — *Frontend Developer*

JUNE 2023 - PRESENT

- User-friendly interface: Designed an intuitive and easy-to-use interface that guides users through the process of creating a professional resume.
- Template selection: Implemented a variety of pre-designed resume templates for users to choose from, allowing them to find a style that suits their needs.
- Customization options: Provided users with the ability to customize various aspects of the resume templates, such as fonts, colors, sections, and layouts.
- Real-time preview: Offered a real-time preview of the resume as users make changes, helping them visualize the final result before exporting.
- Responsive design: Ensured that the web app is responsive and
